

# COVERED CALL INCOME

as of March 31, 2022

## OBJECTIVE

The Covered Call Income strategy seeks income and growth of capital from the sale of covered call options on high-quality U.S. large capitalization equities. Stocks are purchased while call options are written/sold out-of-the-money with the intention of the stocks being called away by expiration.

Supplemental Information, consisting of the Institutional Performance (Net of Fees) is presented to show composite performance when the maximum institutional fee of 0.45% is applied to the composite's gross return. Innovative Portfolios did not have fee-paying institutional clients for all the periods presented above. Institutional Performance (Net of Fees) is supplemental to the Annual Portfolio Performance Presentation.

**Organization:** Innovative Portfolios, LLC ("IP"), established in 2015, is registered as an investment advisor with the Securities and Exchange Commission. IP is wholly owned by Sheaff Brock Capital Management, LLC ("SBCM"). IP claims compliance with Global Investment Performance Standards (GIPS®).

**Description:** The Covered Call Composite invests in approximately 25 to 30 large or mid capitalization U.S. equity positions and writes out-of-the money call options on the same positions. The investment objective of the composite is income and capital appreciation. The Covered Call Composite consists of fully discretionary portfolios, including those accounts no longer with the firm. The composite excludes portfolios under \$100,000. For comparison purposes the composite is measured against the CBOE S&P 500 BuyWrite Index. The Composite was created on January 1, 2021 and the inception date is September 1, 2010.

IP acquired the composite through a subadvisor agreement with Sheaff Brock Investment Advisors, LLC (SBIA), wholly owned by SBCM, in December 2020. Performance prior to January 1, 2021 occurred while the investment management team was affiliated with SBIA. The same investment management team has managed the composite since its inception, and the investment process has not changed. Performance prior to January 1, 2021 is linked to performance earned at SBIA.

Performance presented are time-weighted returns. Valuations and performance is reported in U.S. dollars. Composite performance is presented on gross-of-fees and net-of-fees basis and includes the reinvestment of income (dividends/interest). Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Net-of-fees returns are calculated by deducting a model management fee of 0.3125, ¼ of the highest annual management fee of 1.25%, from the quarterly gross composite return. Actual advisory fees incurred by clients may vary. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request.

The benchmark is the CBOE S&P 500 BuyWrite Index, an index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index. It is a passive total return based on (1) buying an S&P 500 stock index portfolio, and (2) "writing" (or selling) the near-term S&P 500 Index "covered" call option, generally on the third Friday of each month. The S&P 500 Index call written will have about one month remaining to expiration, with an exercise price just above the prevailing index level (i.e., slightly out of the money). The S&P 500 Index call is held until expiration and cash settled, at which time a new one-month, near-the-money call is written. An index should only be compared with a mandate that has a similar investment objective. An index is not available for direct investment and does not reflect any of the costs associated with buying and selling individual securities or management fees, the incurrence of which would have the effect of decreasing historical performance results. There can be no assurances that a composite will match or outperform any particular benchmark.

Past performance is no guarantee of future performance and there is a risk of loss of all or part of your investment. Individual client performance returns may be different than the composite returns listed. Changes in investment strategies, contributions or withdrawals, and economic conditions may materially alter the performance of your portfolio. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment or strategy will be suitable or profitable for a client's portfolio.
