

# PREFERRED INCOME

as of June 30, 2022

## OBJECTIVE

The Preferred Income strategy seeks current income as its primary objective. The portfolio invests in a wide variety of preferred stocks that display high, steady, and consistent income.

Supplemental Information, consisting of the Institutional Performance (Net of Fees) is presented to show composite performance when the maximum institutional fee of 0.45% is applied to the composite's gross return. Innovative Portfolios did not have fee paying institutional clients for all the periods presented above. Institutional Performance (Net of Fees) is supplemental to the Annual Portfolio Performance Presentation. <sup>^</sup>Inception represents a blended benchmark which consists of S&P U.S. Preferred Stock Index prior to April 1, 2012 and the ICE BofA Core Plus Fixed Rate Preferred Securities Index thereafter.

**Organization:** Innovative Portfolios, LLC ("IP"), established in 2015, is registered as an investment advisor with the Securities and Exchange Commission. IP is wholly owned by Sheaff Brock Capital Management, LLC ("SBCM"). IP claims compliance with Global Investment Performance Standards (GIPS®).

**Description:** The Preferred Income Composite invests in approximately 25-30 U.S. preferred equity positions. The investment objective of the composite is income. The Preferred Income Composite consists of fully discretionary portfolios, including those accounts no longer with the firm. The composite excludes portfolios under \$100,000. For comparison purposes the composite is measured against the ICE BofA Core Plus Fixed Rate Preferred Securites Index. The Composite was created on January 1, 2021 and the inception date is October 1, 2011.

IP acquired the composite through a subadvisor agreement with Sheaff Brock Investment Advisors, LLC (SBIA), wholly owned by SBCM, in December 2020. Performance prior to January 1, 2021 occurred while the investment management team was affiliated with SBIA. The same investment management team has managed the composite since its inception, and the investment process has not changed. Performance prior to January 1, 2021 is linked to performance earned at SBIA.

Performance presented are time-weighted returns. Valuations and performance is reported in U.S. dollars. Composite performance is presented on gross-of-fees and net-of-fees basis and includes the reinvestment of income (dividends/interest). Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Net-of-fees returns are calculated by deducting a model management fee of 0.3125, ¼ of the highest annual management fee of 1.25%, from the quarterly gross composite return, applied the first month of each quarter. Actual advisory fees incurred by clients may vary. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request.

Benchmark results presented are a combination of two indices. Prior to April 1, 2012, the benchmark is the S&P U.S. Preferred Stock Index, an index designed to measure the performance of the U.S. preferred stock market and consists of U.S. preferred stocks with a market capitalization greater than \$100 million and a maturity of at least one year or longer. The ICE BofA Core Plus Fixed Rate Preferred Securites Index, an index designed to track the performance of fixed rate U.S. dollar-denominated preferred securities issued in the U.S. domestic market with a rating of at least B3 (based on an average of Moody's, S&P and Fitch) and an investment-grade country risk profile, is used subsequently. An index should only be compared with a mandate that has a similar investment objective. An index is not available for direct investment and does not reflect any of the costs associated with buying and selling individual securities or management fees, the incurrence of which would have the effect of decreasing historical performance results. There can be no assurances that a composite will match or outperform any particular benchmark.

Past performance is no guarantee of future performance and there is a risk of loss of all or part of your investment. Individual client performance returns may be different than the

composite returns listed. Changes in investment strategies, contributions or withdrawals, and economic conditions may materially alter the performance of your portfolio. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment or strategy will be suitable or profitable for a client's portfolio. 1 Current yield is calculated by dividing the annual income (dividends and interest) by the current price of the preferred security. The current yield is based on average-weighted composite holdings as of 6/30/2022. Current yield does not account for any realized or unrealized gain/loss on the holdings in the composite. Current yield does not reflect the deduction of management fees, and if reflected, the fee would reduce data quoted. Current yield is a measurement at a point in time which may differ significantly in the future based upon the holdings in the composite, the price of the securities and the actual income paid.

2 Issuer credit ratings represent the issuer's overall credit creditworthiness and financial strength and not the issue rating which refers to specific financial obligations and considers ranking in the capital structure. Ratings shown are the highest rating given by one of the following national rating agencies: S&P, Moody's, Fitch, DBRS or AM Best. Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Holdings designated NR are not rated by these national rating agencies. Excludes credit spread put options.
